Meet Dr. Perkins: Santa Barbara Cosmetic Surgeon & Aesthetic Specialist

Nationally-recognized, double board certified [cosmetic surgeon](#) and [aesthetic specialist](#), Terry J. Perkins, MD, has been serving the Santa Barbara and the Tri-Counties area for over 30 years. His proven history of excellence in patient care, cutting-edge research and technology, and educational results-driven approach makes Dr. Perkins one of the most well-respected experts in the aesthetic field.

[Dr. Perkins](#) founded the [Cosmetic Surgery Center Medical Group Inc.](#) to provide patients with access to the safest and most advanced technology and surgical techniques. His main Santa Barbara surgical office features a state-of-the-art, fully accredited Surgical Center, and his satellite office in Oxnard offers a wide array of services designed to effectively meet his patients' desire to achieve and maintain a youthful, natural, and "unoperated" look.

Dr. Perkins understands the need for non-invasive medical aesthetic services for people who would like to enhance their skin and body without surgery or extended downtime. [Evolutions Medical Spa](#)—owned and actively supervised by Dr. Perkins—provides a unique alternative to cosmetic surgery through non-invasive options for skin rejuvenation. At Evolutions, Dr. Perkins and his clinical staff (all of whom he has personally and extensively trained) offer a suite of services that include laser treatments, chemical peels, wrinkle reduction, and acne treatments.

Constantly striving to better serve his patients and deliver the highest aesthetic results, Dr. Perkins has a long history of being on the leading edge of technology. He was the first specialist in the Santa Barbara-Ventura area to offer the liposuction surgical procedure as well as the first to utilize fat injection techniques for correcting body contour deficiencies. As a nationally recognized expert in injectables, in 1999 Dr. Perkins was selected to be one of only 16 doctors in the United States to conduct a study leading to the FDA approval of Botox Cosmetic. In 2005, he was chosen to be one of the select doctors involved in the FDA review of VelaSmooth technology, a non-surgical, non-invasive, and painless way to reduce fat and cellulite.

Dr. Perkins grew up in Santa Barbara before attending UCLA and graduating from the University of Colorado School of Medicine. He is Board Certified by the American Board of Cosmetic Surgery and the American Board of Otolaryngology, Head and Neck Surgery. He is a member of the American Academy of Facial Plastic and Reconstructive Surgery, the American Academy of Cosmetic Surgery, the American Society of Liposuction Surgery, the California Medical Association, and the Santa Barbara County Medical Society.
